Result Sheet

Assignment: Standard Test
Student: Ayush Yadav
Total Score: 7/32

Question	Score	Reason
1	0/1	Incorrect ratio applied (used AP/PB instead of AP/AB) and selected incorrect option.
2	1/1	Correctly applied Thales' theorem/proportionality to find AC = 4.4 cm and selected option B.
3	1/1	Correctly identified similarity and calculated corresponding angle $\angle P = 50°$, selecting option D.
4	1/1	Correctly stated the ratio of perimeters as 4 : 7 and selected option B.
5	0/1	Incorrect option chosen (selected B instead of D).
6	0/1	Incorrect calculation and option selected (selected D instead of C).
7	0/1	Incorrect option letter chosen (wrote C instead of D).
8	1/1	Correctly identified and wrote option A matching the answer key.
9	2/2	Correctly proved $\Delta CBA \sim \Delta ABD$ using AA criterion and derived $AB^2 = BC \times BD$.
10	0/3	Did not use triangle similarity ($\Delta AOB \sim \Delta COD$) and failed to find the length of DC.
11	0/3	Only the diagram and problem statement were written; proof was left blank.
12	0/5	Question was not attempted.
13	1/5	Awarded 1 mark for rewriting the given relation as AD/BD = DC/AD. Deducted 4 marks as the similarity of ΔDBA and ΔDAC was not established and the conclusion was assumed without proper proof.
14.i	0/1	Wrote an incomplete ratio; did not calculate the value of BC.
14.ii	0/1	Question was not attempted.
14.iii	0/2	Question was not attempted.
14.iv	0/2	Question was not attempted.
