Result Sheet

Assignment: Standard Test
Student: Harshil Tomar
Total Score: 16.5/32

Question	Score	Reason
Q1	1/1	Correctly selected option (B) 2.16 cm.
Q2	1/1	Correctly selected option (b) 4.4 cm.
Q3	0/1	Did not provide a final answer or option.
Q4	1/1	Correctly selected option (b) 4 : 7.
Q5	1/1	Correctly selected option (d) $DC^2 = CF \cdot AC$.
Q6	1/1	Correctly selected option (c) x = 16, y = 8.
Q7	0/1	Incorrect answer. The correct option is D (Assertion is false, Reason is true).
Q8	1/1	Correctly answered option (A) stating that both A and R are true and R is the correct explanation of A.
Q9	2/2	Correctly proved $\Delta ACB \sim \Delta DAB$ using AA similarity and derived the relation $AB^2 = BC \times BD$.
Q10	3/3	Correctly established similarity between ΔAOB and ΔDOC and calculated DC = 8 cm using the given ratio.
Q11	0.5/3	The proof is logically flawed because it falsely assumes points to be midpoints without the required parallel line construction; awarded 0.5 marks only for the final relation expressing AC in terms of segments.
Q12	0/5	No proof was provided, only rough diagrams were drawn.
Q13	5/5	Correctly used SAS similarity to show $\Delta ADB \sim \Delta CDA$, related the corresponding angles, and proved $\angle BAC = 90°$.
14.i	0/1	Incorrect calculation using an assumed 3-4-5 triplet instead of trigonometry; correct value is BC = 56.4 m.
14.ii	0/1	Incorrect method and answer; correct answer is AG = 38 m.
14.iii	0/2	Incomplete and incorrect attempt; perimeter was not calculated.
14.iv	0/2	Question was not attempted.
