Result Sheet

Assignment: Standard Test
Student: Hitesh Singh
Total Score: 15/32

Question	Score	Reason
Q1	0/1	Incorrect option chosen. Student selected (D) 0.8 cm instead of the correct answer (B) 2.16 cm.
Q2	1/1	Correctly selected option (B) 4.4 cm.
Q3	1/1	Correctly selected option (D) 50°.
Q4	0/1	Incorrect option chosen. Student selected (A) 16:49 instead of (B) 4 : 7.
Q5	1/1	Correctly selected option (D) $DC^2 = CF \cdot AC$.
Q6	1/1	Correctly selected option (C) x = 16, y = 8.
Q7	0/1	Incorrect option chosen. Student selected (A) instead of the correct answer (D).
Q8	0/1	Incorrect option chosen. Student selected (B) instead of (A).
Q9	2/2	Correctly proved $\Delta ACB \sim \Delta DAB$ using AA similarity and established $AB^2 = BC \times BD$.
Q10	3/3	Correctly established similarity between ΔAOB and ΔCOD and calculated DC = 8 cm.
Q11	3/3	Correct construction of DY || BF and proper application of BPT in triangles to prove AF = 1/3 AC.
Q12	1/5	Awarded 1 mark for figure, Given, and To Prove statements. Deducted 4 marks as the main proof was left incomplete.
Q13	2/5	Awarded 2 marks for setting up the side ratio from the given equation and stating angle relations. Deducted 3 marks for citing 'converse of BPT' instead of SAS similarity and flawed angle sum deduction steps.
Q14.i	0/1	Incorrect approach; attempted to find AG using Pythagoras theorem instead of calculating BC.
Q14.ii	0/1	Failed to correctly calculate AG = 38 m using trigonometry.
Q14.iii	0/2	Not attempted.
Q14.iv	0/2	Not attempted.
