Result Sheet

Assignment: Standard Test
Student: Kalp Gupta
Total Score: 9/32

Question	Score	Reason
Q1	0/1	Incorrect option chosen. Student answered A (3.6 cm), whereas the correct answer is B (2.16 cm).
Q2	0/1	Incorrect option chosen. Student answered D (1.1 cm), which is only the length of EC, whereas AC = 4.4 cm (Option B).
Q3	1/1	Correct option D (50°) selected.
Q4	0/1	Incorrect option chosen. Student answered C (12 : 21) instead of B (4 : 7).
Q5	1/1	Correct option D ($DC^2 = CF \cdot AC$) selected.
Q6	0/1	Incorrect option chosen. Student answered A (14 : 6) instead of C (x = 16, y = 8).
Q7	0/1	Incorrect option letter chosen. Student wrote option 'b', but the correct option is D.
Q8	1/1	Correct option A chosen with the correct statement.
Q9	0/2	Student wrote only 'Given' and 'To prove' statements with a diagram; no proof or steps showing triangle similarity were provided.
Q10	3/3	Correctly proved $\Delta DOC \sim \Delta AOB$ using AA similarity, set up the ratio of corresponding sides, and calculated DC = 8 cm.
Q11	3/3	Correct proof using proper construction (DG || BF) and application of the Basic Proportionality Theorem to establish AF = FG = GC and AF = (1/3)AC.
Q12	0/5	Only an incomplete diagram was drawn; no proof was provided to show that PQRS is a parallelogram.
Q13	0/5	Incorrect approach. The student assumed arbitrary angles and lengths (45° and 50 m) rather than proving similarity or using the given relation $AD^2 = BD \times CD$ to prove $\angle BAC = 90°$.
Q14.i	0/1	Question not attempted.
Q14.ii	0/1	Question not attempted.
Q14.iii	0/2	Question not attempted.
Q14.iv	0/2	Question not attempted.
