Result Sheet

Assignment: Standard Test
Student: Lavanya Rawat
Total Score: 8.5/32

Question	Score	Reason
1	1/1	Correct option (B) with accurate value 2.16 cm.
2	1/1	Correct option (B) with accurate value 4.4 cm.
3	1/1	Correct option (D) with accurate angle 50°.
4	1/1	Correct option (B) with accurate ratio 4 : 7.
5	0/1	Incorrect option chosen (B). The correct answer is (D) $DC^2 = CF \cdot AC$.
6	1/1	Correct option (C) with accurate values x = 16, y = 8.
7	0/1	Incorrect option chosen (A). The correct answer is (D) A is false but R is true.
8	1/1	Correct option (A) with correct reasoning.
9	2/2	Correctly proved similarity between ΔABD and ΔCBA using AA criterion and derived $AB^2 = BC \times BD$.
10	0/3	Incorrectly took $\Delta AOD \sim \Delta BOC$ and arrived at an incorrect value DC = 4 cm instead of using $\Delta AOB \sim \Delta COD$ to find DC = 8 cm.
11	0/3	Incomplete proof; essential construction (drawing DG || BF) was missing and the proof was abandoned.
12	0/5	Question was scribbled out and not attempted.
13	0/5	Incomplete proof; started the statement but did not establish triangle similarity or reach the conclusion.
14.i	0/1	Sub-question not attempted.
14.ii	0/1	Sub-question not attempted.
14.iii	0/2	Incorrect calculation for AC and perimeter of triangle ABC was not determined.
14.iv	0.5/2	Awarded 0.5 marks for identifying total path as AF + FE + EB. Deducted 1.5 marks because EB was incorrectly calculated using Pythagoras theorem instead of trigonometry.
