Result Sheet

Assignment: Standard Test
Student: Pushanjali Giri
Total Score: 20.5/32

Question	Score	Reason
1	1/1	Correct option B) 2.16 cm with full working shown.
2	1/1	Correct option B) 4.4 cm with correct application of BPT.
3	0/1	Incorrect option chosen. Student answered C) 130° instead of the correct answer D) 50°.
4	1/1	Correct option B) 4 : 7.
5	1/1	Correct option D) $DC^2 = CF \cdot AC$.
6	1/1	Correct option C) x = 16, y = 8.
7	1/1	Correct option D) A is false but R is true.
8	0/1	Incorrect option chosen. Student selected option B instead of option A.
9	2/2	Fully correct proof showing $\Delta ABD \sim \Delta CBA$ by AA similarity criterion and concluding $AB^2 = BD \times BC$.
10	2.5/3	Correct value of CD = 8 cm obtained using side ratios, but incorrectly cited AA criterion instead of SAS similarity criterion.
11	3/3	Complete and accurate proof with correct construction DG || BF, application of BPT, and concluding AF = (1/3)AC.
12	1/5	Awarded 1 mark for the figure, given information, and construction. Deducted 4 marks as the student left the proof incomplete.
13	5/5	Excellent and complete proof using SAS similarity to establish angle relationships and proving $\angle BAC = 90°$.
14.i	0/1	Incorrect calculation; student solved for AC instead of finding BC = 56.4 m.
14.ii	1/1	Correctly determined AG = 38 m using the 45° right triangle properties.
14.iii	0/2	Incomplete work; student did not calculate the sides or perimeter of ΔABC.
14.iv	0/2	Incomplete answer; student only noted given values and failed to calculate EB or the total length.
