Result Sheet

Assignment: Standard Test
Student: Rupakshi Gupta
Total Score: 17/32

Question	Score	Reason
Q1	1/1	Correct option B selected with value 2.16 cm.
Q2	1/1	Correct option B selected with value 4.4 cm.
Q3	1/1	Correct option D selected with value 50°.
Q4	1/1	Correct option B selected with ratio 4 : 7.
Q5	1/1	Correct option D selected with $DC^2 = CF.AC$.
Q6	1/1	Correct answer x = 16, y = 8 provided.
Q7	0/1	Incorrect option chosen. The correct answer is D (Assertion is false, Reason is true).
Q8	1/1	Correct option A selected.
Q9	2/2	Correctly proved $\Delta ABD \sim \Delta CBA$ using the AA similarity criterion and derived $AB^2 = BC \times BD$.
Q10	3/3	Correctly proved triangle similarity, applied corresponding side ratios, and found DC = 8 cm.
Q11	0/3	Incorrect proof. The problem requires a parallel line construction (DG || BF) to use the midpoint/intercept theorem, but the student incorrectly assumed triangle similarity.
Q12	0/5	Question not attempted.
Q13	5/5	Correctly proved $\Delta ABD \sim \Delta CAD$ using SAS similarity criterion and deduced $\angle BAC = 90°$ through angle sum relations.
Q14.i	0/1	Incorrect approach. Used invalid similarity relations instead of trigonometry in right ΔCHB.
Q14.ii	0/1	Incorrect method; failed to calculate AG = 38 m using right triangle trigonometry.
Q14.iii	0/2	Question not attempted.
Q14.iv	0/2	Question not attempted.
