Result Sheet

Assignment: Standard Test
Student: Tanvi Ch.
Total Score: 14.5/32

Question	Score	Reason
1	1/1	Correct option B) 2.16 cm selected.
2	1/1	Correct option B) 4.4 cm selected.
3	0/1	Incorrect option A) 55° selected. The correct option is D) 50°.
4	0/1	Incorrect option C) 12:21 selected. The correct option is B) 4 : 7.
5	1/1	Correct option D) $DC^2 = CF \times AC$ selected.
6	1/1	Correct option C) x = 16, y = 8 selected.
7	0/1	Incorrect option B selected. The correct option is D) A is false but R is true.
8	1/1	Correct option A selected.
9	1.5/2	Correctly reached $AB^2 = BC \times BD$ using similarity, but named the similar triangles inaccurately.
10	2.5/3	Correctly set up side ratio and found DC = 8 cm, with a minor inaccuracy in specifying the pair of similar triangles.
11	1/3	Drew the construction line and concluded AF = (1/3)AC, but omitted the intermediate proofs using BPT to establish AF = FG and FG = GC.
12	0/5	Only an incomplete rough figure was drawn without any proof or steps shown.
13	4.5/5	Correctly used similarity and the angle sum property to prove x + y = 90°, with minor omission of explicitly stating right angles before applying SAS.
14.i	0/1	Not attempted.
14.ii	0/1	Incorrect formula and calculation attempted.
14.iii	0/2	Not attempted.
14.iv	0/2	Incomplete attempt; failed to calculate the missing length EB to find the total distance.
