Result Sheet

Assignment: Standard Test
Student: Aniket Joshi
Total Score: 23.5/32

Question	Score	Reason
1	0/1	Incorrect option chosen. Student answered A (3.6 cm), while the correct answer is B (2.16 cm).
2	1/1	Correct option selected: B (4.4 cm).
3	1/1	Correct option selected: D (50°).
4	0/1	Incorrect option chosen. Student answered C (12 : 21), while the correct answer is B (4 : 7).
5	0/1	Incorrect option chosen. Student answered C ($BC^2 = AB.CE$), while the correct answer is D ($DC^2 = CF . AC$).
6	1/1	Correct option selected: C (x = 16, y = 8).
7	0/1	Incorrect option chosen. Student answered B, while the correct answer is D (A is false but R is true).
8	1/1	Correct option selected: A (Both A and R are true and R is the correct explanation of A).
9	2/2	Correctly proved $\Delta ABD \sim \Delta CBA$ using AA similarity criterion and derived $AB^2 = BC \times BD$.
10	3/3	Correctly proved triangle similarity $\Delta AOB \sim \Delta COD$, set up the ratio of sides, and found DC = 8 cm.
11	3/3	Correct construction of DG || BF and proper application of BPT in ΔBCF and ΔADG to prove AF = (1/3)AC.
12	3/5	Proved PQ || SR using the converse of BPT, but hand-waved the second pair of opposite sides ('Similarly...') without showing proper steps and ratios.
13	4.5/5	Correctly proved triangle similarity and used angle sum property to show $\angle BAC = 90°$. Minor deduction for repeatedly writing 'congruency' instead of 'similarity'.
14.i	1/1	Correct calculation of BC = 56.4 m using cos 45°.
14.ii	1/1	Correct calculation of AG = 38 m using tan 45°.
14.iii	0/2	Unattempted.
14.iv	2/2	Correct calculation of EB ≈ 46.2 m and total length AF + FE + EB ≈ 152.78 m.
