Result Sheet

Assignment: Standard Test
Student: Kaavya Sharma
Total Score: 20/32

Question	Score	Reason
Q1	1/1	Correct option B) 2.16 cm selected.
Q2	1/1	Correct option B) 4.4 cm selected.
Q3	1/1	Correct option D) 50° selected.
Q4	0/1	Incorrect option C) 12 : 21 selected instead of B) 4 : 7.
Q5	1/1	Correct option D) $DC^2 = CF \cdot AC$ selected.
Q6	1/1	Correct option C) x = 16, y = 8 selected.
Q7	0/1	Incorrect option A selected instead of D.
Q8	1/1	Correct option A selected.
Q9	2/2	Correctly proved $\Delta ABC \sim \Delta DBA$ by AA similarity criterion and derived $AB^2 = BC \times BD$.
Q10	1/3	Correctly showed similarity of vertically opposite triangles (1 mark), but inverted the side ratio (used BA/DC = 2/1 instead of 1/2), resulting in an incorrect answer DC = 2 cm instead of 8 cm.
Q11	3/3	Correct construction and rigorous proof using Basic Proportionality Theorem to show AF = FG = GC and thus AF = (1/3)AC.
Q12	1.5/5	Attempted to use the converse of BPT, but included an invalid construction ('draw AC || PQ') and failed to prove that opposite sides are equal in length or properly establish the parallelogram.
Q13	5/5	Correctly proved similarity between ΔDBA and ΔDAC using SAS similarity and used angle sum property to deduce $\angle BAC = 90°$.
Q14.i	0/1	Incorrect method and value for BC (wrote 53.58 m instead of 56.4 m).
Q14.ii	1/1	Correct calculation using tan 45° to find AG = 38 m.
Q14.iii	0.5/2	Awarded 0.5 mark for the concept of adding three sides for perimeter; side lengths AB, BC, and AC were incorrectly calculated.
Q14.iv	0/2	Question not attempted.
