Result Sheet

Assignment: Standard Test
Student: Kayna Vohra
Total Score: 13.5/32

Question	Score	Reason
1	0/1	Incorrect option chosen (selected A instead of B).
2	1/1	Correct answer chosen (B).
3	1/1	Correct answer chosen (D).
4	0/1	Incorrect option chosen (selected C instead of B).
5	0/1	Incorrect option chosen (selected C instead of D).
6	1/1	Correct answer chosen (C).
7	1/1	Correct answer chosen (D).
8	1/1	Correct answer chosen (A) as per the answer key.
9	0/2	Incorrect proof. Attempted to prove similarity between ΔACD and ΔACB instead of ΔABD and ΔCBA, and failed to prove $AB^2 = BC \times BD$.
10	0/3	Incorrect approach. Selected non-similar triangles ΔAOD and ΔBOC instead of ΔAOB and ΔCOD, and did not determine the value of DC.
11	2.5/3	Correct construction and valid application of BPT in ΔADG and ΔCFB to conclude $AF = (1/3)AC$. Deducted 0.5 marks for omitting explicit justification that $AE/ED = 1$ and $BD/DC = 1$ before equating $AF = FG = GC$.
12	5/5	Correct proof. Validly demonstrated that both pairs of opposite sides are parallel (PS || QR and PQ || SR) using the converse of BPT, proving PQRS is a parallelogram.
13	0/5	Question not attempted.
14.i	0/1	Incorrect trigonometric ratio and value used ($\cos 45°$ taken as 1/2), resulting in an incorrect answer of 20 m instead of 56.4 m.
14.ii	1/1	Correctly applied $\tan 45° = 1$ to find $AG/38 = 1$, giving AG = 38 m.
14.iii	0/2	Question not attempted.
14.iv	0/2	Question not attempted.
