Result Sheet

Assignment: Standard Test
Student: Saakshi Aswal
Total Score: 14/32

Question	Score	Reason
1	0/1	Incorrect option chosen. Student selected option A instead of the correct option B.
2	1/1	Correct option B selected.
3	0/1	Incorrect option chosen. Student selected option A instead of the correct option D.
4	0/1	Incorrect option chosen. Student selected option C instead of the correct option B.
5	1/1	Correct option D selected.
6	1/1	Correct option C selected.
7	1/1	Correct option D selected.
8	0/1	Incorrect option chosen. Student selected option B instead of the correct option A.
9	1/2	Awarded 1 mark for the final ratio and result, but deducted 1 mark as the triangle correspondence and angle justifications used to claim AA similarity were incorrect.
10	3/3	Correctly proved triangle similarity using vertically opposite angles and given ratios, and accurately calculated DC = 8 cm.
11	1/3	Awarded 1 mark for drawing the parallel construction line and attempting midpoint relations, but the proof that AF = FG = GC and AF = (1/3)AC was incomplete and flawed.
12	0/5	Question not attempted.
13	5/5	Fully correct proof establishing SAS similarity between ΔADB and ΔCDA and using the angle sum property to deduce $\angle BAC = 90°$.
14.i	0/1	Incorrect calculation. The question asked for the length of BC (56.4 m), but the student calculated CD = 40 m.
14.ii	0/1	Question not attempted.
14.iii	0/2	Question not attempted.
14.iv	0/2	Question not attempted.
