Result Sheet

Assignment: Standard Test
Student: Samarpan Rawat
Total Score: 19/32

Question	Score	Reason
1	1/1	Correct answer B) 2.16 cm selected.
2	1/1	Correct answer B) 4.4 cm selected.
3	1/1	Correct answer D) 50° selected.
4	1/1	Correct answer B) 4 : 7 selected.
5	0/1	No valid option provided (crossed out/unattempted).
6	1/1	Correct answer C) x = 16, y = 8 selected.
7	0/1	Incorrect option (A) selected instead of (D).
8	0/1	Incorrect option (B) selected instead of (A).
9	2/2	Correct proof using AA similarity of ΔDAB and ΔACB to deduce $AB^2 = BC \times BD$.
10	3/3	Correctly proved $\Delta AOB \sim \Delta COD$ and calculated DC = 8 cm.
11	3/3	Correct construction (DM || BF) and rigorous proof using BPT to show AF = (1/3)AC.
12	0/5	Only rough figures drawn; no proof or solution provided.
13	5/5	Fully correct proof establishing $\Delta BDA \sim \Delta ADC$ by SAS and proving $\angle BAC = 90°$ using angle sum property.
14.i	0/1	Incorrect similarity method used resulting in BC = 50.901 m instead of 56.4 m.
14.ii	1/1	Correctly determined AG = 38 m using triangle properties.
14.iii	0/2	Perimeter was not calculated; only unrelated angle sum work was shown.
14.iv	0/2	Not attempted.
