Result Sheet

Assignment: Standard Test
Student: Shivansh Singh
Total Score: 16/32

Question	Score	Reason
1	1/1	Correctly applied similarity/proportionality to find PQ = 2.16 cm.
2	1/1	Correctly applied Basic Proportionality Theorem to find EC = 1.1 cm and total length AC = 4.4 cm.
3	0/1	Incorrect option chosen (selected A instead of D: 50°).
4	0/1	Incorrect option chosen (selected C: 12:21 instead of B: 4:7).
5	0/1	Incorrect response.
6	0/1	Question not attempted/incorrect.
7	1/1	Correctly evaluated the ratios and selected option D (A is false but R is true).
8	0/1	Selected option B instead of the correct option A.
9	0/2	Incorrect proof; attempted to compare ΔABC and ΔADC instead of establishing similarity between ΔABD and ΔCBA.
10	3/3	Correctly proved $\Delta AOB \sim \Delta COD$ by SAS similarity and used ratio of sides to calculate DC = 8 cm.
11	1.5/3	Awarded 0.5 marks for correct construction (DM || BF) and 1 mark for proving CM = MF in ΔCBF. Deducted 1.5 marks because the proof that AF = FM and conclusion AF = 1/3 AC were incomplete.
12	5/5	Correctly used converse of BPT to show both pairs of opposite sides are parallel (PS || QR and SR || PQ), concluding PQRS is a parallelogram.
13	0.5/5	Awarded 0.5 marks for stating given and to prove. Deducted 4.5 marks as the proof using SAS similarity to show $\Delta DBA \sim \Delta DAC$ and concluding $\angle BAC = 90°$ was not done.
14.i	1/1	Correctly used cos 45° to calculate BC = $40\sqrt{2}$ = 56.4 m.
14.ii	1/1	Correctly used tan 45° to calculate AG = 38 m.
14.iii	0/2	Sub-question not attempted.
14.iv	1/2	Awarded 1 mark for setting up cos 30° = BH/EB and identifying total length formula (AF + FE + EB). Deducted 1 mark due to calculation errors in EB and final sum.
