Result Sheet

Assignment: Standard Test
Student: Tejas
Total Score: 16.5/32

Question	Score	Reason
Q1	1/1	Correctly used similarity ratio AP/AB = PQ/BC to calculate PQ = 2.16 cm (Option B).
Q2	1/1	Correctly applied Basic Proportionality Theorem to find EC = 1.1 cm and AC = 4.4 cm (Option B).
Q3	0/1	Incorrectly selected (B) 75°. The correct answer is (D) 50°.
Q4	0/1	Incorrectly selected (C) 12 : 21. The correct option is (B) 4 : 7.
Q5	1/1	Correctly derived and selected (D) $DC^2 = CF \cdot AC$.
Q6	1/1	Correctly identified (C) x = 16, y = 8 using the Midpoint Theorem.
Q7	0/1	Incorrectly selected (A). The correct answer is (D) Assertion is false but Reason is true.
Q8	1/1	Correctly selected (A) Both Assertion and Reason are true and Reason is the correct explanation of Assertion.
Q9	2/2	Correctly proved $\Delta BAC \sim \Delta BDA$ by AA similarity and derived the required relation $BA^2 = BD \times BC$.
Q10	0.5/3	Awarded 0.5 marks for identifying vertically opposite angles and the ratio of sides. Did not establish correct similarity ($\Delta AOB \sim \Delta COD$) or calculate DC = 8 cm.
Q11	3/3	Full marks awarded. Provided a clear and complete geometric proof using construction and BPT to establish AF = (1/3)AC.
Q12	0/5	Question not attempted.
Q13	5/5	Full marks awarded. Correctly proved $\Delta ABD \sim \Delta CAD$ using SAS similarity criterion and deduced $\angle BAC = 90°$ using angle sum properties.
14.i	1/1	Correctly determined the hypotenuse BC = $40\sqrt{2}$ m using trigonometry.
14.ii	0/1	Attempted using Pythagoras theorem instead of tan 45° and left incomplete without finding AG = 38 m.
14.iii	0/2	Question not attempted.
14.iv	0/2	Question not attempted.
